Let's activate Windows - click WinKey+u By pressing simultaneous ' key' and 'u' (WinKey+u) you will open a window called 'Microsoft narrator' where you can click on some hyperlink called 'Microsoft web site' which in turn will open your default web browser (hopefully IE otherwise it works but with one more step; we get to this soon).. What if you get bored (or you are just lazy) to call Microsoft and to justify yourself and to ask them 'Please, can you activate the copy that I bought legally? Yes, I have an invoice, in fact I have 10 invoices because it happens that I bought more copies than I'm using right now.

No, I'm not a software theft, I cross my heart and hope to die!' Well, in that situation (let me make myself clear: when you both have the legal right to use that piece of software and you don't break the EULA) you could just try to exploit one of the Windows XP weaknesses.

windows keygen reddit

User Manuals Downloads

 Windows XP Product key for SP2 & SP3 100% working Windows Xp is the most basic and simple to use windows version released by Microsoft in 2000.. Windows Xp Product keys more windows xp keys Windows xp service pack keys free copy Delete.. So the ' narrator' window should look like this Click the 'Microsoft Web site' link At this point the idea is to get the IE browser opened because the browser has 'an issue' that we are going to exploit it.
